I do NOT wish to make a personal submission at the hearing, and ask that this written submission be considered.

I wish to talk to the main points in my written submission at the hearings to be held between Tuesday 7 June and Friday 10 June 2005.

The first 81 of this 103 page document is not a plan but rather the rules/ideals to follow when determining the plan. Ratepayers must surely question the value of an expensive production which says so little!

The "key indicators" w "performance measurements" are so vague that strict accountability is difficult.

under 'A Well Governed City' how does the first key indicator equate with the number of council meetings which are not open to the press or the public.

None of the key indicators of p 13-14 can be quantified. Therefore how can we judge the council officer's performances. Ratepayers & voters must be able to judge the effectiveness of

Submissions close on Friday 13 May 2005

both Councillors & Council staff.

P.T.O.

2006 Draft Annual Plan

Regarding the presentation of the actual plan (p 81 →)

Ratepayers want information on money the Council spends. There should be some information regarding the completion of jobs for money outlayed.

eg. Does the planned expenditure of \$1,634,000 on the Ferry ~~Rd~~ Rd Memphis Drive intersection indicate a completed project?

Does the \$598,000 on the Frymes Bridge tell us the project has been downgraded or that the project will drag on for several years.

A coded annotation against an item would make the plan much more useful.

[ie cml = completed project ; ong = ongoing project]
