

HEADING: INDUSTRIAL SUBURBS

Every 2nd or 3rd suburb providing some employment.

I want an attractive & well designed city.

Keep-up walk & Bike to work situation with light industry at shopping areas - an early 20th century phenomenon!
Woolston, Charleston, Addington
Suburban shops on one side of Main Street & a few Factories on the other - Old but good idea

Light industry frontages pleasing to the eye & not the 19th - 20th century purely functional look

No factories that require to be back off the road due to too ugly structures protruding from them.

We design our city to meet current needs & future challenges

Persuading snob areas to have light industry so that other areas don't have to double up.

Perceptions of look and feel of the city

Bus patronage figures

Modes of Transport to work

Residual income after housing costs

Hectares of Public open space

Perceptions so advanced that huge tracts of land are put aside for some Factories, a supermarket and a Park all on the same area.

perceptions of a School and a Park side by side.

I am 61 years of age & lived in Christchurch since 1951

Yours sincerely,

pm Roberts

P.S. A perception not dreamed of in the 1960's.
Papanui Rd. providing so much employment through Motor Inns and Serviced Motels starting business along the road.

Community Outcomes

These Community Outcomes belong us, the people of Christchurch. The City Council has led a process to find out what we as a community wish for Christchurch now and in the future.

The Community Outcomes have been developed over the last year and have been consulted on with the community. Thank you to the groups, individuals and agencies that have contributed their time and experience. The Outcomes will be reviewed in 2012.

Individuals, including you, as well as many groups and organisations, will need to work together to achieve these outcomes. A group of outcome measures, or indicators, has been developed to track our progress towards achieving the outcomes we want.

To the right is a summary of the Community Outcomes. The full version includes more detailed explanations of the Community Outcomes and how progress towards achieving them will be monitored. Along with other organisations – like the Canterbury District Health Board, Ministry of Social Development, Ministry of Pacific Island Affairs – it will be used as the basis for cooperative work.

It is available on request electronically on the web at www.ccc.govt.nz/communityoutcomes or by phoning 941 8999 and asking for a copy to be sent to you.

Disapprove

Many people will be aware of moves that may see the Banks Peninsula district becoming part of Christchurch city. Efforts have been made to align this summary with the views of the Banks Peninsula communities. If the reorganisation goes ahead, the Community Outcomes can be reviewed.
